PROFESSIONAL SUMMARY

Experienced Full-Stack Developer with a proven track record of successfully leading and developing innovative web applications in the fields of system architecture, product management, and user experience design. Skilled in NODE.JS, EXPRESS.JS, and MongoDB with Mongoose, I bring strong communication and time management abilities to drive feature prioritization, application deployment, and web hosting. With a background as a Founder & Lead Developer at APPLYRIGHT and experience in wireline operations at SLB, I am well-equipped for the role of Professional.

WORK HISTORY

FOUNDER & LEAD DEVELOPER

APPLYRIGHT | 2026 - Present

- Developed ApplyRight, an AI-powered resume optimization platform using the MERN stack (MongoDB, Express.js, React, Node.js) for seamless user experience.
- Integrated Google Gemini and OpenAI models into ApplyRight for real-time, context-aware resume analysis and content suggestions.
- Designed a scalable backend architecture for ApplyRight with RESTful APIs, JWT authentication, and automated PDF generation pipelines using Puppeteer.

WIRELINE FIELD OPERATOR

SLB | 2023 - Present

- Executed and monitored wireline logging operations in accordance with safety protocols and company procedures
- Supported field engineers in setting up logging tools and equipment for data acquisition
- Communicated effectively with onsite team members to ensure smooth operations and timely completion of tasks

HAULAGE MAINTENANCE OFFICER

MATRIX ENERGY GROUP | 2021 - 2023

- Performed daily inspections and maintenance checks on haulage equipment to ensure optimal functionality and safety standards compliance
- Collaborated with the procurement team to source and maintain adequate inventory levels of spare parts and supplies for timely repairs and replacements

MAINTENANCE TECNICIAN

CLETUS ELECTRICAL & ELECTRONIC FOUNDATION | 2015 - 2017

- Performed routine maintenance tasks on electrical and electronic equipment at CLETUS ELECTRICAL & ELECTRONIC FOUNDATION.
- Troubleshooted and repaired faulty electrical systems to ensure smooth operations.
- Collaborated with other maintenance engineers to schedule and prioritize maintenance activities for optimal efficiency.

SKILLS

- **Technical:** NODE.JS, EXPRESS.JS, MONGODB WITH MONGOOSE
- **Professional:** Team player, Excellent time management abilities, Strong communication abilities, Product Management
- **Additional Skills:** Full-Stack Development, Back-End Web Development, System Architecture, User Experience (UX), User Interface Design, Feature Prioritization, Application Deployment, Web Hosting

EDUCATION

ELECTRICAL & ELECTRONIC ENGINEERING

PETROLEUM TRAINING INSTITUTE | 2019-2021

- 3.7/4.0

PROJECTS

APPLYRIGHT

Link: https://applyright.com.ng/

- Utilized AI technology to analyze job descriptions and customize resumes with relevant keywords for optimal ATS performance
- Managed database of job descriptions and keyword trends to ensure resume accuracy and alignment with industry standards
- Collaborated with the development team to enhance the AI algorithm for improved resume matching and success rates

OPSLINE

Link: https://opsline.netlify.app/

- Developed Field Operator Web Tool (Opsline) for wireline Segment
- Supported field operators in ongoing learning and operational readiness
- Streamlined access to critical resources for increased operational efficiency
- Improved employee engagement and satisfaction
- Enhanced safety and compliance through well-informed operators
